For 10 points, name this Rossini opera about Figaro, a hairdresser.**

ANSWER: *The **Barber of Seville**, or The Useless Precaution [or Il **barbiere di Siviglia**, ossia L'inutile precauzione]*

079-11-41-04114

14. **This leader was responsible for a mass sterilization program that sterilized 7.8 million people in under a year. Raja Ramanna carried out the Smiling Buddha test explosion of a nuclear bomb authorized by this prime minister in 1974. This leader also authorized Operation Blue Star, which was an assault on the Golden Temple in Amritsar. That attack led to this prime minister being (*) assassinated by her Sikh bodyguards a few months later in retaliation. For 10 points, name this Prime Minister of India who was mother to Rajiv and Sanjay and the daughter of Jawaharlal Nehru.**

ANSWER: **Indira Priyadarshini Gandhi** [prompt on **Gandhi**]

023-11-41-04115

15. **This country's national epic tells of a Titan called Adamastor who was transformed into a mountain range. Another author from this country attacked Christianity in *The Gospel According to Jesus Christ* and wrote a novel in which the "girl with the dark glasses" suffers from an epidemic of "white sickness" that the doctor's wife avoids. This country is home to the author of (*) *Blindness*, Jose Saramago. For 10 points, name this Iberian country, the western neighbor of Spain.**

ANSWER: **Portugal** [or **Portuguese Republic**; or **Republica Portuguesa**]

080-11-41-04116

16. **This character owns a magic pouch made of dragon-skin to hold the remains of his victims. Although this character immune to metal weapons, he dies after his arm is ripped off by a man who fights him bare-handed. John Gardner wrote a novel from the perspective of this character, whose mother lives in a dark mere and kills Aeschere in revenge for his death. For twelve years, this (*) creature terrorizes Heorot, the hall of Hrothgar and the Danes. For 10 points, name this monster who is killed by Beowulf.**

ANSWER: **Grendel**

080-11-41-04117

17. **The data from this effort is stored in the Ensembl database. This effort used BAC libraries followed by the creation of shotgun clones, which were then aligned into contigs. The Sanger Institute participated in this effort, and it was directed by Francis Collins. Much of the samples used in this project came a from single man in Buffalo. Craig (*) Venter's company competed with this effort, which initially stated that humans have around thirty thousand genes. For 10 points, name this public project which mapped the human DNA sequence.**

ANSWER: **Human Genome Project** [or **HGP**]

048-11-41-04118

18. A verse from the Quran about this person miraculously receiving food from God is commonly written in calligraphy on the mihrab (meer-OB) of a mosque. This daughter of Imran and Hannah is depicted in the only painting on the Kaaba walls that Mohammed did not order destroyed. She is discussed more in the Quran than any other (*) woman, and is the only woman mentioned by name. For 10 points, name this venerated figure in Islam, who is the mother, by virgin birth, of Isa.

ANSWER: Mary [or Maryam]

019-11-41-04119

19. This country's current president founded the Good Government Foundation. Ruled for many years by the National Front, this nation's contemporary leaders include Alvaro Uribe and Juan Manuel Santos. Ingrid Betancourt was recaptured after being held hostage for over six years in this country. Home to the (*) FARC guerilla group, Pablo Escobar operated mainly out of this country. For 10 points, name this South American country whose cities of Medellin (meh-deh-YEEN) and Cali were long a base for drug cartels.

ANSWER: Republic of Colombia [or Republica de Colombia]

040-11-41-04120

20. The luminosity of different forms of these objects is related to their velocities using the Faber-Jackson and Tully-Fisher relationships. The Seyfert (SAY-fert) variant emits ionized gas and is thought to contain an accretion disk and a super massive black hole at their center. Edwin Hubble developed a "tuning fork" to classify these objects. The (*) Local Group is a collection of these objects that includes the Large Magellanic Cloud. For 10 points, name these astronomical objects that come in elliptical and spiral variants and which include Andromeda and the Milky Way.

ANSWER: galaxy

064-11-41-04121

21. This monarch claimed "you will find Calais written on my heart" after losing it to the French. During this ruler's reign, dissenters were executed in the "Smithfield Fires," and the former Archbishop Thomas Cranmer was tried and executed. This leader ruled for five years after the death of her brother Edward VI. This only daughter of (*) Catherine of Aragon had most of her Catholic reforms rolled back by her half-sister and successor. For 10 points, name this daughter of Henry VIII who ruled as Queen of England before Elizabeth I.

ANSWER: Mary I of England [or Mary Tudor; or Bloody Mary; prompt on Mary]

015-11-41-04122

22. These works are often divided into two parts hinging on a central "cutting word." One author wrote a critical commentary for an anthology of works in this form entitled *The Seashell Game*. A notable example of this poetic form is about a (*) frog jumping into an old pond. This form typically includes a seasonal reference and makes up three-fifths of the collaborative *renga*. For 10 points, Matsuo Basho was a prolific author of what Japanese poems with five, seven, and five-syllable lines?

ANSWER: haiku [or haikai verse; or haikai no renga; prompt on renga]

020-11-41-04123

23. One form of this phenomenon can be initiated by charge transfer due to collisions with particles of graupel. Less commonly observed forms of this phenomenon include blue jets and red sprites. That first form of this phenomenon has two steps, the step leader and the much brighter return stroke. It occurs when the breakdown voltage of (*) air is exceeded, and is attracted to sharp points like trees and metal poles. For 10 points, name this atmospheric electric discharge often followed by thunder.

ANSWER: lightning

132-11-41-04124

1. Colors mix from a distance to create a new color in this style of painting. For 10 points each:

[10] Name this style of painting in which landscapes are drawn in pencil first before they are filled with colored dots.

ANSWER: **pointillism**

[10] This French pointillist painter depicted young workmen taking their leisure by the River Seine in *Bathers at Asnieres* and city dwellers in *Sunday Afternoon on the Island of La Grande Jatte*.

ANSWER: George **Santayana** [or Jorge Agustin Nicolas Ruiz de **Santayana** y Borrás]

052-11-41-04215

16. Name some polyatomic ions for 10 points each:

[10] This polyatomic ion is paired with a hydrogen atom in its namesake monoprotic acid. It has formula NO_3^- .

ANSWER: **nitrate**

[10] This ion with formula ClO_4^- has the chlorine atom in the very high oxidation state of +7.

ANSWER: **perchlorate**

[10] This other anion has formula C_2O_4^- and is a common component of calcium-containing kidney stones.

ANSWER: **oxalate**

127-11-41-04216

17. This composer, whose piano teacher was Carl Czerny, used a theme from Bellini's "March of the Puritans" to write his *Hexameron*. For 10 points each:

[10] Name this Hungarian composer, whose works include the *Hungarian Rhapsodies* and a series of notoriously difficult *Transcendental Etudes*.

ANSWER: Franz **Liszt** [or Ferenc **Liszt**; accept names in either order].

[10] Both Liszt and Beethoven wrote variations on one of these pieces by Antonio Diabelli. Liszt also wrote a few examples of this dance in 3/4 time named for Mephisto.

ANSWER: **waltzes**

[10] Liszt's *Faust Symphony* shares thematic material with the 1859 opera *Faust*, which was written by this French composer. He used an adaptation of a Bach prelude in his *Ave Maria*.

ANSWER: Charles Francois **Gounod**

048-11-41-04217

18. One character created by this man is a twin brother of Louis XIV known as the "Man in the Iron Mask." For 10 points each:

[10] Name this French author of *The Count of Monte Cristo* and *The Three Musketeers*.

ANSWER: Alexandre **Dumas**

[10] This protagonist of *The Three Musketeers* falls in love with Constance and is antagonized by Milady de Winter.

ANSWER: **D'Artagnan**

[10] This musketeer takes up the cloth and becomes a bishop before leading the plot to replace Louis with the Man in the Iron Mask.

ANSWER: **Aramis**

015-11-41-04218

19. The R variety of these structures confers antibiotic resistance, and when used in the laboratory they are often engineered to have a polylinker sequence. For 10 points each:

[10] Name these small pieces of circular DNA that lie outside of the main bacterial chromosome.

ANSWER: **plasmid** or **episome**

[10] This is the process which bacteria use to transfer plasmids to each other. It involves the formation of a sex pilus.

ANSWER: **conjugation**

[10] One example of a eukaryotic plasmid is the 2 micrometer one found in this type of fungi. The *S. cerevisiae* ("S"-seh-reh-VEE-see-ay) variant of this fungi is typically used in baking.

ANSWER: **yeast**

048-11-41-04219

20. For 10 points each, name these French masters of the short story.

[10] This author of "Ball of Fat" also wrote about Madame Loisel losing the title piece of fake jewelry in "The Necklace."

ANSWER: Henry Rene Albert Guy de **Maupassant** (MOE-puh-SAHNT)
